

WELWITSCHIA  
WCC ENVIRONMENTAL  
SERVICES SOLUTIONS (PTY) LTD

# Global Environment Standards through African Expertise

# WHY CHOOSE WELWITSCHIA ENVIRONMENTAL SERVICES SOLUTION

We are a 100% Namibian-owned company, locally based with footprints in Otjiwarongo, providing landscaping and maintenance in northern Namibia. Our Management team has vast knowledge, which goes into effect to guarantee that we do our part to protect the environment.

WCC Environmental Services Solution (WCCE) ensures that all safety regulations are met as stipulated per Fauna and Flora scope 16. While maintaining, servicing/repairing equipment or disposing, we are familiar with Namdeb Oranjemund safety standards and procedures

We are registered with BIPA as a competent service provider with the necessary accompanying qualifications.

Our team has extensive experience in the mining industry and commercial sectors.

**100% NAMIBIAN-  
OWNED COMPANY,  
LOCALLY BASED  
HAVING A  
FOOTPRINT IN THE  
NORTH.**

# OUR SERVICES

WCCE use only top quality Tools, equipment and products which save time, money and ensure for the best outcome.

When you're looking for a new Garden Design Or Maintenance remember that every garden is unique, and your design and maintenance approach should be tailored to your specific space, preferences, and lifestyle. Regular care and attention will help you enjoy a thriving and beautiful garden throughout the seasons. The first step is receiving a quote from a provider. With a quote in hand, you can assess the coverage. We offer an associated costs, allowing you to make sound purchasing decisions.

**Golf Course Maintenance:** We provide maintenance activities aimed at keeping course resources in good working condition. Thus this includes repairing and replacing club assets, mowing and chemically treating turf, eliminating ball marks, improving playing conditions and many more.

Having a sprinkler system turns hours of watering and a daily struggle into a reliable automated process. Your lawn and garden should work for you, and we are determined to show you that planning your own irrigation design can be a very simple task with a little guidance.

We ensure that local parks, sensitive environmental areas and cultural resource sites within the parks are managed as Natural or Cultural Resource Areas.

Cut away dead, obstructive, or excess branches from trees and shrubbery. Utilize chain saws and work in crews to safely cut down limbs. Climb trees with safety devices to properly cut down limbs. Prune or treat trees or shrubs using handsaws, pruning hooks, sheers, and clippers.

# OUR SERVICES GREENKEEP
